EDUCATION

PROGRAM	INSTITUTION	% or CGPA	COMPLETION YEAR
B.Tech in Chemical Engineering	Indian Institute of Technology Madras, Chennai	6.97 / 10	2020
XII (ISC Board)	Swaraj India Public School, Kanpur	95.25 %	2016
X (ICSE Board)	Swaraj India Public School, Kanpur	95.8 %	2014

Technical Skills	<i>Languages</i> – Javascript, Typescript, Java, Python <i>Frameworks</i> – Spring Boot, Micronaut, NestJS, NextJS, React, Angular
-------------------------	---

PROFESSIONAL EXPERIENCE

Honeywell Technology Solutions (Dec'24 -Present)	Advanced Software Engineer – Performance + - Led end to end design and development of features for Performance+ application on top of Forge Platform - Contributing as Full Stack Engineer in microservices based architecture, building scalable front end interfaces with React and developing robust backend services using NodeJS
Honeywell Technology Solutions (Jul'24 -Dec'24)	Advanced Software Engineer – Flight Efficiency Honeywell Aerospace - Integral part of the ETL team working on NextGen Flight Efficiency Software on top of Azure Databricks - Proactively analyzed and identified the gaps in the ETL Pipeline and devised solutions to fill those gaps - Developed python scripts for raw data sanitization and identification of missing records
Honeywell Technology Solutions (Aug '20 – Jul'24)	Software Engineer II – Intelligrated Software Honeywell SPS - Received Silver Award for leading the end to end design and development for storage selection module to allow horizontal scaling of putaway service using Hazelcast as the distributed cache - Submitted an IDF titled “Data Processing via DataOps Platform in WES for multitenancy” pertaining to how the mystic platform can reduce the cost for maintaining data pipelines by ~40% with HA/DR enabled - Driving the development of REDS Framework to allow WES to move to Azure Cloud, laying out detailed process of integrating Azure Service Bus and Kong Gateway with existing AKS Cluster - Awarded SPS Star Award 2022 for exceptional work in optimizing API response times and achieving 3x boost in performance, bumping up the load handling capacity from 2k/hr to 6k/hr - Developed Microservices in Java using Spring Boot along with Apache Kafka, RabbitMQ and Hazelcast

INTERNSHIP EXPERIENCE

Hakimo (Mar '20 – Apr '20)	<i>Hakimo is an early stage startup based in US, focusing on security surveillance</i> - Co-Heading the development of the primary cloud based application for viewing live camera feed and playback from security cameras using RTSP and AWS Kinesis Video Streams. - Orchestrated deployment of new Producer SDK Container for each customer using Docker and AWS ECS. - Developed the application using React and NodeJS implementing live streams over websockets
LeanAgri Technology Solutions (May '19 – July '19)	<i>AgriTech Startup based in Pune – Software Development Intern</i> - Integral part of 5 member team working on Customer Relationship Management Software, driving 33% increase in onboarded customers & generating leads - Developed an application from scratch to create, store, link and display multilingual blogs based on location - Redesigned the User Interface for LeanAgri Enterprise, B2B software for tracking farmer activities

PROJECTS

Shaastra Prime	<i>A Suite of In House Cloud Applications to manage key aspects of Shaastra (Tech Fest of IIT Madras)</i> - One Stop Solution for all internal functioning of Shaastra, onboarding 500+ members, across 12 Teams - Developed Task Management App to establish efficient communication between several internal teams - Developed Participant Registration Portal and Dashboard to view live registrations with useful insights - Developed App for Allocation of Rooms for Participants, providing better and smooth overall experience
Stairway	<i>A Multiplayer Game Arena with Games like Literature, CallBreak and Wordle</i> - Developed and Deployed a cross-platform, realtime application, available on Android, iOS and Web - Built a scalable design system and UI library in React as part of the application development - Built as a Modern Monorepo using Turborepo and NextJs framework

POSITIONS OF RESPONSIBILITY

Core Member Shaastra, 2020 Web Operations	<i>Co-Head of ISO Certified Technical Festival of IIT Madras witnessing footfall over 50,000 people</i> - Led a team of 10 developers to build 8+ cloud based applications in a 6 month timeframe - Optimized existing Shaastra Android App and introduced first ever iOS app, built using React Native - Developed various backend services in NodeJS and initiated container based deployment using Docker
